Greetings Ingrid and Tom: in response to our RA's request, we are looking for any brief updates on the Part 192 and Subpart W rulemaking efforts by COB today if possible (see below). Any information would be helpful even if there has been no recent EPA activity on one or both efforts.

Also, any brief information you can provide on an apparent NRC/EPA MOU and whether revisions are being considered would be helpful.

Thanks!

Douglas Minter
UIC Unit Manager

Importance: High

Please see below. I provided the paper we did in January – he's looking for updates since that time. I will need updates by tomorrow am.

Thanks
D

Subject: Meeting with Wyoming Mining Association - Uranium Subcommittee

Darcy and Suzanne:

I have a meeting with the uranium member of WMA on Thursday and I have some questions/background that I hope you can help me with before then.

1.

Ex. 5 Deliberative Process (DP)

2. Energy One letters. The issue, what are we communicating to them and when will those communications be ready.
3. Revision of 40 CFR Part 6 Subpart W. Background please. Is this issue linked to the Energy One issue?
4. EPA-NRC MOU revision. I have a call into HQ on this but if either of you can shed light on this I would appreciate it. Apparently there has been a call by some to rewrite our MOU with NRC and I'm curious if either of you have heard any status update on this matter.
5. Part 192 rulemaking. Any status update would be helpful.

Any information on any other matter that you believe would be of interest.

Thanks,

Doug
